Two of the most important days in your life are the day you are born and the day you find out who you are.
Mark Twain

This quote captures the essence of what many people experience on their spiritual journey. For some, this realization may come later in life when they discover that this has been their natural calling to nurture and heal, only to find that the path to discovering their purpose comes through trials and challenges that shape who they are meant to become.

One individual shared how a series of seemingly unrelated careers and life changes finally led them to a profession they never expected: guiding others through spiritual healing. Despite the twists and turns, they realized each step had been preparing them for this role. In retrospect, it felt as though their natural listening, and an inner voice perfectly aligned with their purpose, had been leading them toward this all along.

This journey to discovering our true calling is not just about accumulating skills and experiences; it's about understanding how these are intricately woven into our spiritual purpose and how they are meant to play in the world. It's about focusing toward the unique role we are
